

[Sql Injection Tool Get Cc Cvv2](#)

The screenshot shows the jSQL Injection v0.2 application window. The title bar reads "jSQL Injection v0.2". The "Connection" section at the top shows the URL "http://127.0.0.1/simulate_get.php?lib=" and the method "POST". Below this is a "Connect" button and a "Show Settings" button.

The main interface is split into two panes. The left pane shows a tree view of the database structure, including "func (0 rows)", "general_log (2 rows)", "help_category (38 rows)", "help_keyword (464 rows)", and "help_relation (1027 rows)". The "help_category" folder is expanded, showing fields: "help_category_id", "name", "parent_category_id", and "url".

The right pane displays a table titled "mysql.help_category (3 fields)". The table has columns: "#", "nbRow", "help_category_id", "name", and "url". The data rows are as follows:

#	nbRow	help_category_id	name	url
1	1	10	Account Management	
2	1	11	Point properties	
3	1	12	Encryption Functions	
4	1	13	LineString properties	
5	1	14	Logical operators	
6	1	15	Miscellaneous Functions	
7	1	16	Functions and Modifiers for Use with GROUP BY	
8	1	17	Information Functions	
9	1	18	Comparison operators	
10	1	19	Bit Functions	
11	1	1	Geographic	
12	1	20	Table Maintenance	
13	1	21	User-Defined Functions	
14	1	22	Data Types	
15	1	23	Compound Statements	
16	1	24	Geometry constructors	

The bottom section of the window contains a "Console" pane with the following text:

```
Connection test...
Get insertion character...
Time based test...
Blind test...
Error based test...
Normal test...
Using normal injection...
Fetching informations...
Fetching databases...
Done.
```

At the bottom, the status bar shows: "Database version 5.5.20-log", "Current db test", "Current user root@localhost", and "Authenticated user root@localhost". On the right side of the status bar, there are checkboxes for "TimeBased", "Blind", "ErrorBased", and "Normal", with "Normal" checked.
